### Education

2024 **PhD, Computer Science**, *University of Utah*.

Advisor: Valerio Pascucci

2015 Bachelor of Computer Science, University of Utah.

Thesis: "G-MAP: A High Dimension Data Grand Tour Map"

2015 **Bachelor of Applied Math**, *University of Utah*.

# Research Experience

### University of Utah

Aug, 2016 - **Research Assistant**.

present My research focus encompasses the fields of visualization, explainable AI, and high-performance computing. I am interested in designing novel data visualization techniques to assist researchers from various scientific domains in studying large datasets and complex computation models.

Lawrence Livermore National Laboratory

May 2023 Apply Lossy Compression in Generative Model Training.

Aug 2023 Apply state-of-art lossy compression technique, ZFP on generative model training for scientific simulation. The main goal is to reduce the size of training data (e.g. 3.5TB->20GB) without affecting the performance of the generative model.

May, 2018, 2019 Visualize, Model and Predict Silent Error Propagation.

Aug,2018,2019 Apply visualization, machine learning, and data mining techniques to understand the impact of silent data corruption in high-performance computation. Design efficient data analysis parallel solution to analyze large unstructured datasets.

May 2016 - High Dimensional Data Visualization and Analysis.

Aug 2016 Apply dimension reduction, clustering, and statistical approaches to understand the complex high dimensional data. Design an interactive visualization system to help researchers to explore high-dimensional data.
